

## DIE-CAST INSET AVIATION LIGHTS

These lights give off a bright white, red or green colour light which are highly visible. They need absolutely no maintenance and can operate for 5 continuous years without any maintenance at all. Installation of these lights are easier due the fact that they feature an all-in-one design which means that the water cannot ingress into the lamp-holder (this may happen with other conventional helipad lights that need continuous lamp changing and maintenance due to water ingresses into the lamp holder).

### Main Parameter:

1. Light intensity:  $\geq 100\text{cd}$
2. Light source: Ultra high intensity LED
3. Base material: Aluminium
4. Service life of LED: 100000hours
5. Signal mode: Steady-burning
6. Operating voltage: AC220V, 50/60 Hz  
(Option voltage. AC120V, DC48V)
7. Emitting color: Blue, Green, White, Red and Amber
8. Power consumption: 20W
9. Overall size:  $\Phi 194\text{mm} \times 138\text{mm}$
10. Installation size:  $\Phi 199\text{mm} \times 146\text{mm}$
11. Ambient temperature:  $-55^{\circ}\text{C} \sim +70^{\circ}\text{C}$
12. Weight: 4.9kg
13. Protection standard: IP68
